Accuracy and the Laws of Credence
Richard Pettigrew

Print publication date: 2016
Print ISBN-13: 9780198732716
Published to Oxford Scholarship Online: May 2016
DOI: 10.1093/acprof:oso/9780198732716.001.0001

(p.236) (p.237) Index

accuracy dominance 5
actual frequentism about chance 133
additive Bregman divergence 65, 84
best-system analysis of chance 120, 135
Bratman, Michael 207
Brier Alethic Accuracy 8
Briggs, Rachael 196
Bronfman, Aaron 69
Buchak, Lara 223
Caie, Michael 111
calibration 57–64
calibration accuracy 60
conditionalization 187
conditionalization pair 197
conditionalization rule 187
convex hull 83
convex set 83
credence function 2
current chance hypothesis 113
de Finetti, Bruno 5, 17, 26, 83
decision principles
- $\mathscr{C}$-Maximin 175
- Current Chance Evidential Immodest Dominance 128
- Current Chance Evidential Undominated Dominance 128
- Current Chance* Evidential Immodest Dominance 143
- Current Chance* Evidential Undominated Dominance 143
- Deontological Immodest Dominance 27

Dominance 9, 20
Dominance* 21
Epistemic Dominance 72
Future Credence Immodest Dominance 194
Hurwicz$_\lambda$ criterion 169
Immodest Dominance 24
Maximin 161, 165
Maximize Subjective Expected Utility 189
Supervaluationist Dominance 73
Undominated Dominance 22
Ur-Chance Initial Immodest Dominance 125
Ur-Chance Initial Undominated Dominance 124
dependent goods 49
divergence 47
Dutch book arguments 11, 188, 192
Easwaran, Kenneth 26
epistemic utility theory 2
expected inaccuracy 24
extremely $\mathfrak{J}$-modest 24
Fitelson, Branden 26
Greaves, Hilary 189, 227
Hájek, Alan 41, 107
Howson, Colin 77
imaging 203
inaccuracy measures
absolute value measure 34
additive logarithmic 37, 69, 176
additive spherical 70
Brier score 8, 176
logarithmic 37, 176, 200
weighted Brier score 43
Ismael, Jenann 137, 140
James, William 166
Jaynes, E. T. 158
Joyce, James M. 2, 28, 31, 40, 203
Konek, Jason 169
Leitgeb, Hannes 35, 202
Lewis, David 101, 204
Lockean Thesis 53
Maher, Patrick 34
metric 47
moderately $\mathfrak{J}$-modest 24
non-reductionism about chance 122
omniscient credence function 3
one-dimensional divergence 51
opinion set 2
worlds relative to 4
Paris, J. B. 159
